

## **Kindergarten Program**

Significant research has been put into our kindergarten program to have a curriculum that is basic to every school in Texas. If a child passes or exceeds the standards set in our program, there should be no problem with your child entering the first grade, public or private

The following areas of study are included in our curriculum:

**Language Arts & Reading**

**Mathematics**

**Science**

**Social Studies**

Music, art and weekly chapel are also incorporated into the learning process.

In lieu of field trips, classroom enrichment activities are added, for example: visits from the fire department, the zoo mobile, a visit from a professional such as a dentist, puppet shows and other presentations, as arranged.
